Distributed storage and forwarding for your cloud applications running on a community infrastructure

Alastair Ong, Director of Product

HOLO
HOSTING

Holo Hosting: A Subsidiary of Holochain Foundation

- Help Holochain apps work everywhere by providing optional cloud infrastructure that extends peer networks
- Community Owned Cloud Hosting Infrastructure
- Decentralized resilience and digital autonomy baked in

HOLO
HOSTING

Our First Two Services (More Coming!)

Cloud Nodes

Always-online nodes for consistent availability, validation, and connectivity

Web Bridge

Simple, HTTP-based read-only access to data in your DHT

HOLO
HOSTING

See It In Action!

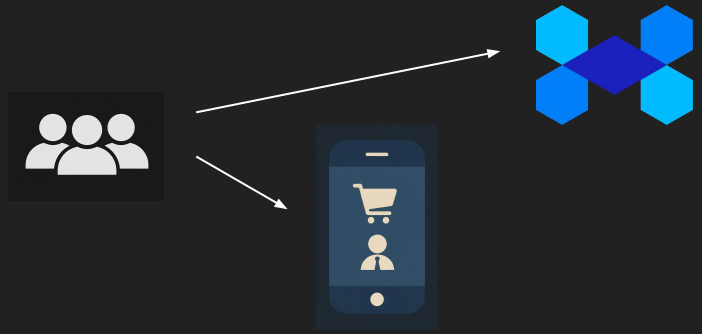
Demo Time!

HOLO HOSTING

Integration Options

- You own user relationship
- You control charging / monetization

Coming soon

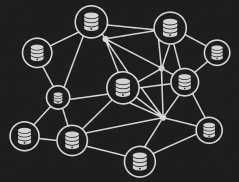


- Users have direct relationship with Holo
- No middleman - fully decentralised
- In development - seeking your input

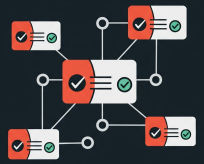
HOLO
HOSTING

What This Enables

DHT resiliency



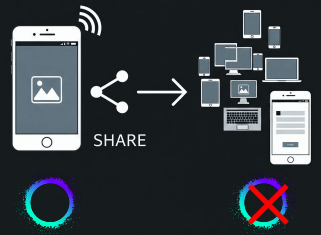
Diverse Validators



Content Publishing

Asynchronicity

Social Sharing



Polling and Automation

HOLO HOSTING

Moving Forward Together

- **Get started:** Contact me at alastair.ong@holo.host for early access. Self-service tools coming soon
- **Coming next:** Static site hosting • Authority nodes • Data storage
- **Reach out for:** Feature requests • Feedback • Early access
- **We build what you need** - tell us!
